Customer Impact Risk	Minimal
Communicated Externally?	Not Proactively
Downtime Impact	During the software installation, users CANNOT: • Perform breath collections • Connect to Retriever™ for result transmission or receive onboarding information such as users IDs and passwords
Release Summary	• Connectivity enhancements for stability and usability • Capture additional donor demographics to enable Chain of Custody Form (CCF) delivery in the future

CHANGE: ENHANCEMENTS TO CONNECTIVITY

- **Impact:** Base station improvements made to stabilize connectivity and provide visual indicators to the operator.

    o Connectivity icons in the header will now appear green when connected to Retriever™.

    o Local admins can now navigate to the 'About' screen to determine connectivity status and type – Wi-Fi, cellular, etc.

    o Operator can now connect to hidden networks by entering the name of the network.

- **Purpose:** Ensures stable connectivity and increases usability within the user interface.
