

Cannabis Breath Testing for the Energy Sector

Cannabis legalization is contributing to a rising number of workplace safety incidents and risks, prompting many employers in related energy industries to re-evaluate their drug testing programs.

REDUCE SAFETY RISKS BY TESTING FOR CANNABIS

In industries where a single accident can have major safety, brand, environmental, and financial impacts, testing for THC makes sense. But legacy tests with long detection windows may no longer provide energy employers with the information they need to make informed decisions. The solution is a cannabis breath test that limits detection to a few hours, helping to deter workday use and promote employee fairness.

"THE ULTIMATE VALUE OF A WORKPLACE DRUG TESTING PROGRAM IS TO KEEP EMPLOYEES SAFE FROM THE IMPACTS OF DRUGS AND ALCOHOL IN THE WORKPLACE."

– Substance abuse prevention leader at oil + gas company

BENEFITS OF IMPLEMENTING THE HOUND® CANNABIS BREATHALYZER

- + Increase workplace safety
- + Deter workday cannabis use
- + Lower recruiting + staffing expenditures
- + Address liability concerns
- + Help reduce chance of lawsuits
- + Virtually eliminate drug test cheating

SAFETY + FAIRNESS™

HOUNDLABS.COM

The HOUND® CANNABIS BREATHALYZER is intended to detect recent cannabis use. It does not measure whether, or how much, a person is impaired. It is intended solely for use in employment, law enforcement, and insurance settings. It should not be used for any medical or therapeutic purposes, or for any Federal drug testing programs, such as programs run by the Substance Abuse and Mental Health Services Administration (SAMHSA), the Department of Transportation (DOT), and the U.S. military.
