

# Cannabis Testing for the Gaming Industry

The gaming landscape is known for dynamic innovation. So why place high stakes on test types that can't identify workday marijuana use when you can win big with breath testing?

## AN ALARMING NUMBER OF EMPLOYEES ARE FREQUENT CANNABIS USERS

Hound Labs survey of more than 500 people who use cannabis at or before work.

**91%**  
ARE  
MONTHLY  
USERS

**82%**  
ARE  
WEEKLY  
USERS

**53%**  
ARE  
DAILY  
USERS

## DETER + DETECT WORKDAY CANNABIS USE

THC accounts for more than half of all positive drug tests, and companies who don't drug test are 1.5X more likely to have active cannabis users working for them<sup>1</sup> – creating financial, reputational, and other workforce risks. In an industry where time is money, an unproductive employee who uses cannabis at work can slow profit velocity.

Our revolutionary breath test limits cannabis detection to a few hours, finally providing gaming employers a drug test that can help deter and detect use correlating to an employee's workday.

That's a smart bet.

**"WE GET 20 TO 50 CANDIDATES EVERY TWO WEEKS, AND ABOUT 30-50% OF THEM WILL FAIL A TEST FOR THC."**

– Gaming Commissioner

## BENEFITS OF IMPLEMENTING THE HOUND® CANNABIS BREATHALYZER

- + Deter workday cannabis use
- + Increase workplace safety
- + Improve productivity
- + Virtually eliminate drug test cheating

## SAFETY + FAIRNESS™

The HOUND® CANNABIS BREATHALYZER is intended to detect recent cannabis use. It does not measure whether, or how much, a person is impaired. It is intended solely for use in employment, law enforcement, and insurance settings. It should not be used for any medical or therapeutic purposes, or for any Federal drug testing programs, such as programs run by the Substance Abuse and Mental Health Services Administration (SAMHSA), the Department of Transportation (DOT), and the U.S. military.
